. Fun leisure game are better if it have Chinese $\fbox{.}$ Got killed 3 times by a fish that thinks its a submarine. 10/10

PS... Snakes! Snakes everywhere! They will get you with their ninja stealth.. I like this game because it is challenging and difficult at times, the controls are tight but tricky to master, there is a good choice of custom options and unlockable riders and tracks, definatlely feels like a good arcade-y racing game from the past. Pick it up if you can.

If it looks like something you'd like and you see a price you're okay paying, then get it.

But I'm not sure.

For me it was kinda too slow to get some stuff done.

And it didn't live up to everything it could have been. unclog the hood with the all new scumbag remover COLON BLOW! guaranteed to BLOW THOSE FREAKS OFF YOUR STREET, ASAP!. This is such a great game! This game is nothing but boss battles. It looks like Cuphead and Rabi Ribi had a baby. The game is very hard and if you beat a boss phase without getting hit you get another extra phase which is even harder! The amout of polish in this game exceeds the limit, it runs so fine on my AMD cpu. Although the rebind control menu needs fixing because you can't change movement for the left stick, it keeps doing 'leftstickleft' and it frickin sucks! So instead i'm using Joy2Key to solve that problem.

Anyway, this is such a satisfying little challenging game that oozes with so much charm and replayabilty! One of my favorite games of 2018!

You should get it! Absolutely recommended!. Horrible game, i played 2 hours and killed one deer that i didnt even get rewarded for, i had to follow footprints for all this time. not worth just one deer. i would not recommend this game because of the time and effort for one animal.

pros~ nothing

cons~
bad graphics
dont get rewarded for kills
waste of time

This game is just a dora the explora 4 hour long lets play.. Overall 6\/10

Ravenmark is a turn-based tactical game in a fantasy setting.

The player commands a small number of units battle after battle as a story unfolds in the background.

Ravenmark is NOT an RPG, there are no role-playing elements whatsoever.

Ravemmark is NOT a strategy game, as the player does not manage the army and does not make any decision out of the battlefield.

Ravenmark is NOT an interactive story, as the player can only read the story, but cannot interact with at all.

PROS:

- + The combat system has some nice elements to it (formations, facing, abilities, terrain)
- + There\u2019s a good variety of units and maps, and it doesn\u2019t get repetitive too soon.
- + It\u2019s very easy to understand how it works, yet some battles present interesting tactical challenges.

CONS

- The player\u2019s actions have no impact at all once a battle is won, all you get for a win is access to another battle, with a predetermined setup.
- For a IOS port any price tag above 5\$ is too much.
- The story you get to read is uninteresting at best.
- Little to none replayability.

Overall:

Tiny turn-based tactical game that should be taken for what it is: do you want to spend 15 minutes moving pieces on a chessboard-like map? This game does that. Anything else, look elsewhere.. After playing and enjoying Pixel Puzzles Japan I decided to give this game a try and I'm glad I did. They took the concepts in the Japan version and went further with a mini game to play while putting the puzzles together also there is a neat mini game on the menu screen which is fun in it's own right. If you enjoy doing Jigsaw Puzzles but like me don't have the room at home to do a puzzle then this game is for you.. Well the dev listened.

Atleast I now have a place for my stuff.

And carbon.
